

KIET HA

Engineer

HIGHLIGHTS •

- **3 years in IT software:**
 - 3 years of experience in developing both website and window form applications.
 - Solid understanding of OOPs and Functional Programming concepts.
 - Solid experience in analyzing and problem solving.
 - Logical thinking, fast learning a new technology.

TECHNICAL SKILLS •

- **Programming Skills**
 - Program languages: C#, Java, JavaScript and SQL.
 - Technologies: Entity Framework, ASP.NET Core, Spring MVC and Spring Boot.
 - Web technologies : HTML5, CSS3, JSON, Bootstrap, JQuery and ReactJS.
 - Databases: SQL Server and MySQL.
 - Source Controls: GIT.
 - Platforms: Windows, Linux and Android.
 - Others: Postman.

RELEVANT PROJECTS •

OUTLOOK ADD-IN FOR MACOS

Engineer

It is an add-in for MS Outlook 365 on Mac OS to support email data protection for MacOS users who are using MS Outlook.

Main functions

- Send the email with the secure file (Encrypted email)
- Read the email has the secure file (Decrypted email)

Responsibilities

- Clarify the project requirements.
- Develop UI (User Interface) for the add-in.
- Testing
- Deployment
- Fix bugs/issues.

Technologies

- ReactJS.
- NodeJS.
- HTML/CSS.
- Use modules related to ReactJS.
- IDE: Visual Studio Code

PORTFOLIO WEBSITE

Engineer

Develop a website to introduction my-self.

Responsibilities

- Clarify the project requirements.
- Develop UI (User Interface) for the website.
- Fix bugs/issues.

Technologies

- ReactJS.
- Vite
- NodeJS.
- HTML/CSS.
- Use modules related to ReactJS.
- IDE: Visual Studio Code

HEALTHCARE WEBSITE

Engineer

The project is to build a website introducing the Healthcare products and an administration site to manage the content such as Health Care products, News, SEO, and Ecosystem.

Responsibilities

- Clarify the project requirements.
- Develop UI (User Interface) for the website.
- Design and create a database.
- Implement all APIs for Front End.
- Fix bugs/issues.

Technologies

- ReactJS
- ASP.NET Core and Clean architecture.
- Database: SQL Server.
- IDE: Visual Studio Code, Visual Studio 2022.

AUSTRALIA/EUROPE WEBSITE

Engineer

The project is to build a website introducing the company to ANZ and Europe market and an administration site to manage its content.

Responsibilities

- Clarify the project requirements.
- Develop UI (User Interface) for the website.
- Design and create a database.
- Implement all APIs for Front End.
- Fix bugs/issues.

Technologies

- ReactJS
- ASP.NET Core and Clean architecture.
- Database: SQL Server.
- IDE: Visual Studio Code, Visual Studio 2022.

SALES MANAGEMENT SOFTWARE

Engineer

The application is to manage one or a chain of stores such as: Convenience, Fashion, Electronics stores and etc.

Main functions

- Product and Order management.
- Inventory management.
- Employee management.
- Export daily/monthly reports.

Responsibilities

- Clarify the project requirements.
- Develop UI (User Interface) for the system.
- Define solution and implementation.
- Fix bugs/issues.
- Documentation.

Technologies

- Entity Framework, windows form.
- DevExpress.
- Database: SQL Server.
- Design Patterns: MVC.
- IDE: Visual Studio 2017.

ERP SYSTEM

Engineer

The project is to build a system to monitor the product manufacturing process and manage the progress to manufacture of the factory. Besides that, the ERP system also has the functions to support the user to manage the invoice, employee, inventory, and export daily/monthly report.

Main function

- The production process of the items management.
- Inventory management.
- Receipt management.
- HR management.
- Export daily/monthly reports.

Responsibilities

- Clarify the project requirements.
- Breakdown and implement features.
- Develop UI (User Interface) for the system.
- Fix bugs/issues.
- Documentation.

Technologies

- Entity Framework, windows form.
- DevExpress.
- Database: SQL Server.
- Design Patterns: MVC.
- IDE: Visual Studio 2017.

SOFTWARE MANAGEMENT

Engineer

It is a system to manage the software and versions that have been released. Besides that, it also has the function to support to upgrade the software to the latest version automatically.

Responsibilities

- Clarify the project requirements.
- Design and create a system database.
- Implement all APIs for Front End.
- Develop UI for system.
- Fix bugs/issues.

Technologies

- Entity Framework, windows form.
- ASP.NET
- Database: SQL Server
- IDE: Visual Studio Code, Visual Studio 2022
